This Prescription Drug Formulary is accurate as of the last update date and is subject to change. This is not a guarantee of coverage or benefits. Please check your member handbook to verify coverage or call Providence Health Plan Customer Service at 503-574-7500 or 1-800-878-4445 (TTY: 711). Service is available five days a week, Monday through Friday, between 8 a.m. and 6 p.m.
The Providence formulary

What is a formulary?

Your prescription drug plan provides coverage for drugs listed on the Providence formulary (list of covered drugs). The formulary includes drugs that are dispensed by a pharmacy and self-administered. Developed in collaboration with Providence Health Plan, physicians, nurses, and pharmacists, the formulary includes FDA-approved prescription generic, brand-name and specialty drugs that are considered effective and safe for use for a variety of conditions.

- **Generic drugs**, which are available only after the brand-name patent expires:
  - Have the same active ingredient formula as the brand-name drug and
  - Are tested by the Food and Drug Administration (FDA) to be as safe and effective as the brand-name drug.

- **Brand-name drugs** are those that are sold under a specific name or trademark by the company that originally got FDA approval. These drugs are protected by patents and typically cost more than generic drugs

- **Specialty drugs** are those that require special delivery, handling, administration, and monitoring by a pharmacist.
  - These drugs are listed in the Providence formulary with a status of “Specialty,” and are available typically through our preferred specialty pharmacy Credena Health

How do I find drugs on the formulary?

You and your healthcare provider can search the formulary to find effective, quality drugs that minimize your out-of-pocket expenses.

There are two ways to search this formulary document:

1. By medical condition category (for example: drugs used to treat heart conditions are listed under the category, *Cardiovascular Agents*).
2. By index (provides an alphabetical listing of drugs included in the formulary and the page number they are listed on).

You can also search for your drugs on the “Drug Search” online tool for your formulary found at: [https://www.providencehealthplan.com/members/pharmacy-resources](https://www.providencehealthplan.com/members/pharmacy-resources)

What if my drug is not on the formulary?

Providence Health Plan strives to provide a comprehensive formulary of safe, effective, and affordable drugs. There may be times that you require a drug that is not on the formulary. If you currently take a prescription drug that is not on the formulary, or your provider would like to start you on a drug that is not listed on the formulary, you may contact customer service to confirm coverage for that drug. If the prescription drug is not covered, your doctor may request a formulary exception.

There are some drugs that are excluded from coverage under your prescription drug benefit. Refer
to your summary plan document for a full list of benefit exclusion. Some examples include, but are not limited to:

- Drugs that are not approved by the Food & Drug Administration (FDA)
- Drugs that are available without a prescription (known as over-the-counter drugs), unless they are required to be covered by the government (see ACA Preventive Drugs below)

**What does the formulary tell me about the coverage of my drugs?**

This formulary provides you with information about what tier the drug is on and any restrictions or limitations that may be on the drug.

The first column of the chart lists the “Drug Name”
- Brand-name drugs are CAPITALIZED (for example, JANUVIA®)
- Generic drugs are listed in lower-case italics (for example, simvastatin)

The second column of the chart lists the “Drug Status”
- This lets you know the tier that the drug will be covered at. Drugs on lower tiers usually have lower costs associated with them.
- Refer to your member handbook and/or benefit summary to determine what amount you will pay at the pharmacy for drugs on that tier. This may vary depending on whether you have met your deductible, if applicable.

The third column of the chart lists the “Requirements/Limits”
- This lets you know if there are any special requirements for coverage of your drug.
- Some examples of requirements are prior authorizations, quantity limits or step therapy.

See the section below for explanations regarding tiers and restrictions/limitations

**Formulary updates**

The formulary is updated every two months. Providence Health Plan’s Pharmacy and Therapeutics (P&T) Committee (comprised of various clinical providers and pharmacists who practice in the communities we serve) continuously reviews the latest evidence to identify opportunities to promote safe, effective, and affordable drug therapy.

Generally, the formulary status of a drug covered by your prescription drug coverage will not change during the year unless:

- The drug becomes available in generic form;
- There are safety or effectiveness concerns raised about the prescription drug; or
- The P&T Committee determines that changes to the formulary would be in the best overall interest of members.
Know more, Save more

Providence Health Plan wants to help you to make the most of your prescription drug coverage. That’s why we strive to provide you with the information you need to make smart decisions about drugs and your health.

We encourage you to be knowledgeable about your prescription drug benefits. Information is available on your benefit summary, in your member handbook, on the Providence Health Plan website, and on myProvidence (a portal for specific information related to your plan and benefits).

Tips for maximizing your benefit

Get a 90-day Supply of your Maintenance Drugs

- Maintenance drugs are those typically prescribed to treat long-term or chronic conditions, such as diabetes, high blood pressure and high cholesterol.
- A 90-day supply of maintenance drug is available through participating mail-order pharmacies, as well as through preferred retail pharmacies.
- Your 90-day supply copay or coinsurance applies and will often save you money over time.

Use Preferred or Mail-Order Pharmacies

- You have access to an expansive network of participating pharmacies nationwide at discounted rates. Search the Pharmacy Directory to locate participating pharmacies near you.
- A preferred retail pharmacy can provide up to a 90-day supply of prescription drugs.
- A mail-order pharmacy can provide up to a 90-day supply of maintenance drugs and specializes in direct delivery to your home.

Search your pharmacy directory for a pharmacy near you

Try Generic Alternatives

- Making the switch from brand to generic drug can save you money.
- There are two types of generic drugs:
  - **Generic equivalent** - A generic equivalent is a generic drug that has the same active ingredient, dosage form and strength as its brand-name counterpart. Generic equivalents are an important option to brand-name prescription drugs because they cost less.
    - Example: Crestor®, a brand-name drug commonly used to treat high cholesterol, is now available in generic form under the name rosuvastatin. Crestor® and rosuvastatin are identical drugs – the only difference is that one costs more than the other.
Generic alternative - A generic alternative is a generic drug used to treat the same condition as a brand-name drug. It is not, however, the exact same drug as the brand-name drug. According to clinical evidence, a generic alternative can be expected to treat the same condition as well as the brand-name option. Generic alternatives are an important option for prescription drugs for which there is no generic available.

- Example: duloxetine, the generic form of Cymbalta®, may be prescribed instead of brand-name Fetzima® in the treatment of depression.

Remember, even if a generic equivalent is not yet available, safe and effective generic alternatives may be available to treat most common conditions. Using these options can provide cost savings. Depending on your benefit, brand name drugs may no longer be covered at its current cost sharing tier when the generic equivalent becomes available. You may be subject to a higher cost share. The formulary document may not immediately reflect this change upon the release of the generic formulation to the market.

Additional Information About Your Formulary

Drug Tiers

Tiers represent the cost you may pay for a drug. The specific cost for the tier will be outlined in your benefit summary. The tier levels for this formulary are outlined below:

<table>
<thead>
<tr>
<th>Tier Name</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACA Preventive</td>
<td>Covered in full, zero cost share</td>
</tr>
<tr>
<td>Generic</td>
<td>Generic drugs</td>
</tr>
<tr>
<td>Brand</td>
<td>All non-specialty brand-name drugs</td>
</tr>
<tr>
<td>Specialty</td>
<td>Specialty drugs (brand-name and generic)</td>
</tr>
</tbody>
</table>

Refer to your benefit summary for additional details.

Restrictions/Limitations

The following abbreviations may be found within the formulary list:

<table>
<thead>
<tr>
<th>Abbreviation</th>
<th>Description</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>PA</td>
<td>Prior Authorization Required</td>
<td>You (or your provider) are required to get prior authorization before you fill your prescription for this drug. Without prior approval, your drug may not be covered.</td>
</tr>
</tbody>
</table>
### Abbreviation Description Explanation

<td></td>
<td>Required</td>
<td></td>
</tr>
<tr>
<td>Specialty Drug</td>
<td>Requires use of Specialty Pharmacy</td>
<td>This drug may only be filled at a contracted Specialty pharmacy, such as Credena Health.</td>
</tr>
<tr>
<td>LA</td>
<td>Limited Access Drug</td>
<td>This drug may only be filled at certain pharmacies per the drug manufacturer. Credena Health may not be able to provide some of these drugs since they are limited to only a few pharmacies. Contact Customer Service at 877-216-3644 (TTY: 711), Monday – Friday, 8 a.m. to 6 p.m. (Pacific Time), for more information.</td>
</tr>
<tr>
<td>C</td>
<td>Custom Message</td>
<td>This will be a message specific to that drug to outline special requirements for coverage.</td>
</tr>
</tbody>
</table>

Prior authorization is a process to review a prescription drug for coverage before it is dispensed to you.

- Many factors (including the potential for side effects, what conditions the drug is approved for use in by the FDA, and the clinical value of the drug) are considered before making the decision to require prior authorization of a prescription drug.
- A limited number of drugs require prior authorization review; any drugs requiring prior authorization are indicated as such in the formulary.
- Keep in mind, the formulary may contain other suitable options:
  - You and your provider may wish to discuss the possibility of changing your prescription to an effective formulary alternative.
  - Otherwise, your doctor may submit a prior authorization request on your behalf.

Quantity Limits are a restriction to the amount of drug you can get from your pharmacy at a time. These are typically put in place to make sure that you the drug you are taking is done so in a safe and effective way.

- For example, sumatriptan tablets (used for migraine headaches) are limited to nine (9) tablets every 30 days. This is because using too much of this drug can actually cause more frequent and more severe headaches.
Step therapy is a form of prior authorization. Its purpose is to confirm if drugs generally considered “first-line” therapy based on clinical evidence have already been tried.

- If they have been tried, the drug requiring step therapy will automatically be approved.
- In the event these drugs are not tried first, cannot be tried first, or your prescription drug history is not available (for example, if you are a new patient for Providence Health Plan), prior authorization is required.

**ACA Preventive Drugs**

Your plan, in accordance with The Patient Protection and Affordable Care Act (PPACA), provides coverage for drugs without imposing a copayment, coinsurance, or deductible. Coverage is provided for a variety of drug categories, including routine vaccinations recommended by the Advisory Committee on Immunization Practices (ACIP). Coverage of ACA Preventive Drugs are subject to your plan’s benefit and may be excluded under certain plans (see your plan’s Benefit Summary or Member Handbook for details).

If a generic equivalent becomes available for a brand-name ACA Preventive Drug, the brand-name drug may no longer be covered in full. The brand-name version may be subject to your applicable brand name cost share and, depending on your benefit, the difference in cost between brand and generic.

**Safe Harbor Preventive Drugs**

The safe harbor drug list is made up of drugs that are considered “first-line” to prevent the onset of a disease or condition. These drugs are important tools to maintain good health and well-being. The IRS definition of safe harbor is contained in Notice 2004-23, section 223 (c)(2)(C).

These drugs are indicated with “SH” on the formulary. If your plan provides for preventive drug coverage (check your Benefit Summary), these drugs will be available to you at the cost-share indicated by the tier, and they will not be subject to your deductible. Any restrictions/limitations will still apply (such as prior authorization or quantity limits).
