

HelpScript™ Program

(Formerly known as Smart RxAssist)

Program Features

- Helpscript is a free program that helps lower the out-of-pocket costs of medications for eligible members.
- In some cases, you may have to pay a small copay but will automatically receive a reimbursement check for the amount you paid within 45 days.
- Medications eligible for the program are subject to change and are not a guarantee of coverage. Prescription drug formulary and prior authorization requirements still apply.

Eligibility

- Not all insurance plans are eligible for this program.
- Program exclusions include:
 - Age 65 years or older
 - Enrollment in a Medicare or Medicaid plan
 - Enrollment in a Washington-based health plan
 - Enrollment in a Health Savings Account (HSA) plan
- Because this program provides the medication at no cost to you, the cost of the medication does not apply to your annual deductible or copay requirements.

Enrollment and Participation

- You are automatically enrolled in the program if you are enrolled in an eligible plan and take an eligible specialty medication in the Helpscript program.
- If you are filling an eligible medication in the Helpscript program, a patient advocate may reach out to you to complete program enrollment.

The medications currently eligible for the Helpscript program are listed below.

For questions about this program, please contact a Helpscript Patient Advocate at **833-798-6732**.

Helpscript Program - Eligible Medications as of 08/01/2025.

Note: Medications eligible for the program are subject to change.
