

Smart RxAssist Program

Program Features and Eligibility

- + The Smart RxAssist program helps lower your out-of-pocket costs to \$0 for eligible specialty medications. In some cases, you may have a small fee which you will be reimbursed for via check within 45 days.
- + There is no cost to you for participating in the Smart RxAssist program.
- + The medications currently eligible for the Smart RxAssist program are listed below. Medications eligible for the program are subject to change.
- + Because this program provides a \$0 cost not subject to the deductible, the tax laws regarding a health savings account makes the program unavailable to those enrolled in the Health Savings Account (HSA) medical plan.

Enrollment and Participation

- + You are automatically enrolled in the program if you take an eligible specialty medication in the Smart RxAssist program.
- + If you are filling an eligible medication in the Smart RxAssist program, a patient advocate may reach out to you to complete program enrollment.
- + This list of eligible specialty medications is not a guarantee of coverage. Prescription drug formulary and prior authorization requirements still apply.

For questions about this program, please contact a Smart RxAssist Patient Advocate at 833-798-6732.
