

# Smart RxAssist Program

---

## Program Features and Eligibility

- + The Smart RxAssist program helps lower your out-of-pocket costs to \$0 for eligible specialty medications.
- + There is no cost to you for participating in the Smart RxAssist program.
- + The medications currently eligible for the Smart RxAssist program are listed below. Medications eligible for the program are subject to change.
- + Because this program provides a \$0 cost not subject to the deductible, the tax laws regarding a health savings account makes the program unavailable to those enrolled in the Health Savings Account (HSA) medical plan.

## Enrollment and Participation

- + You are automatically enrolled in the program if you take an eligible specialty medication in the Smart RxAssist program.
- + If you are filling an eligible medication in the Smart RxAssist program, a patient advocate may reach out to you to complete program enrollment.
- + If you do not participate in the Smart RxAssist program, you will be subject to a higher specialty medication cost share, as defined by the Smart RxAssist program. This cost share varies, based on the medication. The higher out-of-pocket cost will not apply to your medical plan deductible or out-of-pocket maximum.
- + This list of eligible specialty medications is not a guarantee of coverage. Prescription drug formulary and prior authorization requirements still apply.

For questions about this program, please contact a Smart RxAssist Patient Advocate at 833-798-6732.

SmartRx Assist Program - Eligible Specialty Medications as of 4/1/2022
