## Services Available to Providence Health Plan Members

*Only available for Providence Health Plan members in Eastern Washington\**

As a Providence Health Plan member, you have options to meet your health care needs, including access to health care professionals who participate in several provider networks. PHP provides you the option to continue using your former Group Health physician and medical clinics at the in-network level. If you select care from a Group Health provider, you will also have access to a number of Group Health services. The following table shows services available to Providence Health Plan members who live or work in Eastern Washington, including access to Group Health’s full-service primary care clinics that are in the Providence Health Plan network.

Service*	Comments
Behavioral Health Services	Established patients only
