SCOPE: Providence Health Plan, Providence Health Assurance, Providence Plan Partners, and Ayin Health Solutions as applicable (referred to individually as “Company” and collectively as “Companies”). **The full Company portfolio of current coding policies is available online and can be [accessed here](#).**

POLICY APPLICATION

- Providence Health Plan Participating Providers Non-Participating Practitioners
 Commercial Medicaid/Oregon Health Plan Medicare

POLICY STATEMENT

Note: There are temporary provisions in place for this policy during the COVID-19 public health emergency. See the [Procedure](#) section below for information regarding these emergency provisions.

- I. This policy (67.0.A) “Telemedicine Services During COVID-19 Public Health Emergency for Medicare Plans” **APPLIES ONLY TO TELEHEALTH SERVICES FOR MEDICARE LINES OF BUSINESS FOR SERVICES DURING THE COVID-19 PUBLIC HEALTH EMERGENCY (PHE)**. For two-way video visits prior to March 1, 2020, providers are referred to Providence Health Plan Coding Policy 67.0 (Telehealth Services Requiring an Originating Site), which is available on ProvLink.

- II. The Office for Civil Rights at the Department of HHS requires all telehealth platforms to be HIPAA-compliant beginning the day after the end of the PHE on May 11, 2023. Smart phone video options such as FaceTime and Skype will no longer be an option for telehealth services beginning May 12, 2023, based on these requirements. For dates of service on or before May 11, 2023, codes listed on this policy may be paid for telehealth services where the patient and/or provider is calling from a personal device. No contract amendment or attestation is required.
- III. Telecommunication services are services delivered via an electronic two-way communication system. Company provides coverage for telecommunication services when the service is medically necessary and supported by evidence-based medical criteria. Coverage for telecommunication services includes payment for consultations, office visits, individual psychotherapy, and pharmacologic management. All providers (including chiropractors and naturopaths) who are credentialed with Company and who are performing services within their scope of license may perform telecommunication services listed on this policy. Telecommunication services may not be billed as “incident to.”
- IV. Effective March 1, 2020, through May 11, 2023, Company will allow payment for medically appropriate services identified on [List A](#) when performed using two-way video connection or telephone (telephone may be used only for codes with “audio” indicator) where the patient is calling from a personal device. Providers may also use a personal device to perform these services. For services on or after May 12, 2023, and until further notice, Company will allow payment for medically appropriate services identified on List A only when performed using a HIPAA-compliant device. The following conditions must be met for Company to make payments for telecommunication services listed on this policy The following conditions must be met for Company to make payments for telecommunication services listed on this policy:
 - A. Except for codes with “audio” indicator, the service must be furnished via an interactive video telecommunication system;
 - B. The service must be furnished by a physician or authorized practitioner credentialed with Company (may not be billed “incident to”);
 - C. The service must be furnished to an individual who is eligible for telecommunication services with Company.
- V. Inpatient telehealth consultations (HCPCS codes G0425-G0427 and G0406-G0408) are furnished to Company members in hospitals or skilled nursing facilities via telecommunication technology at the request of the physician of record, the attending physician, or other appropriate source. The physician or practitioner who furnishes the inpatient consultation via telecommunication technology may not be the physician or practitioner of record or the attending physician or practitioner, and the inpatient

telehealth consultation must be distinct from the care provided by the physician or practitioner of record or the attending physician or practitioner.

- VI. Additional telecommunication services not addressed on this policy:
- A. Telephone visits (CPT codes 99441-99443 and 98966-98968) are covered by Company as described on **Coding Policy 92.0**.
 - B. Online digital (e.g., email) services (CPT codes 99421-99423 and CPT codes 98970-98972) are covered by Company as described on **Coding Policy 53.0**.
 - C. Company also pays virtual check-in services (HCPCS code G2012) for both new and established patients.

Professional Charges

- VII. As a condition of Company payment for telecommunication services, the physician or practitioner **must be licensed to provide the service under State law**. When the physician or practitioner is licensed under State law to provide a covered telecommunication service (i.e., professional consultation, office and other outpatient visits, individual psychotherapy, or pharmacologic management), then he or she may bill for and receive payment for this service when delivered via a telecommunication system.

PROCEDURE

NEED AND DURATION OF EMERGENCY PROVISIONS

- Need for the temporary Provisions: Emergency provisions for Telehealth Services to accommodate COVID-19 Public Health Emergency (PHE).
- Documents or source relied upon: CMS Policy and Regulatory Revisions in Response to the COVID-19 PHE.
- Effective Date: February 4, 2020.
- Termination Date: December 31, 2024.
- Reassessment Date determined at Companies' sole discretion: December 31, 2024.

THIS POLICY DOES NOT REQUIRE THE PATIENT TO BE LOCATED IN AN ORIGINATING SITE. THIS IS AN EMERGENCY PROVISION SUBJECT TO CANCELLATION AT THE SOLE DISCRETION OF COMPANY.

GENERAL

The use of a telecommunication system may substitute for a face-to-face, "hands on" encounter for services listed on this policy. The CPT/HCPCS codes covered by this policy are listed on [List A](#) at the end

of the policy. **Telemedicine rules do not apply when the beneficiary and the practitioner are in the same location even if audio/video technology assists in furnishing a service.**

Except for codes indicated as “audio,” the codes on [List A](#) must be performed by two-way video connection.

Originating Site Facility Fee Payment Methodology

For the duration of the public health emergency, the patient may receive telecommunication services at home or when calling from a personal device and is not required to be in an originating site. The instruction in this section (Originating Site Facility Fee Payment Methodology) apply only to services that are performed when the patient is located in an originating site, such as outpatient hospital or physician’s office.

To receive the originating facility site payment, submit claims with HCPCS code Q3014, “Telehealth originating site facility fee” (short description “telehealth facility fee”). The type of service for telehealth originating site facility fee is “9, other items and services.”

The benefit may be billed on bill types 12X, 13X, 22X, 23X, 71X, 72X, 73X, 76X, and 85X. Unless otherwise applicable, report the originating site facility fee under revenue code 078X and include HCPCS code Q3014.

If the originating site is a physician’s office, the office location code (or place of service code) “11” is the only payable setting for code Q3014. The provider who bills the originating site facility fee may not be the same provider (or the same provider group or the same tax identification number) as the provider who is billing for services performed.

Modifier G0 (Telehealth services for diagnosis, evaluation, or treatment, of symptoms of an acute stroke) may be added to Q3014 to identify services furnished for treatment of acute stroke. This modifier is not required by Company but will not affect payment if used.

Location Codes and Modifiers for Dates of Service Beginning March 1, 2020, Through December 31, 2021

For dates of service between March 1, 2020, and December 31, 2021, telecommunication services on [List A](#) on this policy may be reported either with location code 02 (Telehealth) or with the same location code that would have been used for a face-to-face service.

- **Location code 02:** Modifiers GT and 95 are not required for services billed with location code 02 and will not affect payment if used. For services with a site of service payment differential billed with location code 02, Company uses the facility payment rate.
- **Same location code as an in-person service:** Providers may use the same location code that would be used for a face-to-face service, with the addition of Modifier 95 or Modifier GT to indicate that the service was performed by telecommunication technology. Either Modifier 95 or Modifier GT is required for telecommunication services billed with the same location where the face-to-face service would have occurred.

- **Preventive medicine services** (CPT codes 99381-99397) are paid by Company when performed by two-way video connection. Use the same location code as an in-person service and append Modifier 52 and either Modifier GT or Modifier 95. Both Modifier 52 and either Modifier GT or Modifier 95 must be appended to preventive medicine codes billed as telehealth services.

Location Codes and Modifiers **for Dates of Service on or After January 1, 2022**

Either modifier 93 or modifier FQ is required for all services performed using audio-only communication technology on or after January 1, 2022.

Modifier 93: Synchronous telemedicine service rendered via telephone or other real-time interactive audio-only telecommunications system

Modifier FQ: The service was furnished using audio-only communication technology

For dates of service on or after January 1, 2022, telecommunication services on [List A](#) on this policy must be reported either with location code 02 (Telehealth Provided Other than in Patient’s Home) or location code 10 (Telehealth Provided in Patient’s Home). Modifiers GT, 95, GQ, and G0 are not required but will not affect payment if used.

- **Location code 02:** Patient is located in hospital or other facility when receiving health services or health related services through telecommunication technology. Services billed with location code 02 will be paid at the facility rate.
 - **Either modifier 93 or modifier FQ is required for services performed using audio-only communication technology.**
 - Modifiers GT, 95, GQ, and G0 are not required but will not affect payment if used.
- **Location code 10:** Patient is located in a private residence (location other than a hospital or other facility) when receiving health services or health related services through telecommunication technology. Services billed with location code 10 will be paid at the non-facility rate.
 - **Either modifier 93 or modifier FQ is required for services performed using audio-only communication technology.**
 - Modifiers GT, 95, GQ, and G0 are not required but will not affect payment if used.
- **Preventive medicine services** (CPT codes 99381-99397) are paid by Company when performed by two-way video connection. Use either location code 02 or location code 10 as appropriate based on the patient’s location and append Modifier 52 to the CPT code.
 - **Modifier 52 is required for preventive medicine codes performed as telehealth services.**
 - Preventive medicine services may not be performed using audio-only technology and will be denied if billed with modifier 93 or modifier FQ.

POLICY REVISION HISTORY

Date	Revision Summary
3/2023	Annual review (converted to new template 5/2023). Original policy effective date: 3/2020
5/2023	Add HCPCS codes G3002 and G3003 retroactive to 1/1/2023. Updated guidance from Office of Civil Rights showing that only HIPAA-compliant platforms may be used for telehealth services on or after May 12, 2023.
6/2023	Changed termination date for emergency provisions from December 31, 2023, to December 31, 2024.

APPENDIX

Table 1: List A: Communication Technology Indicator

Codes with “audio” indicator on this list may be performed by telephone if two-way video connection is not available or feasible. **Either modifier 93 or modifier FQ is required for services performed using audio-only communication technology on or after January 1, 2022.**

Codes without “audio” indicator may be performed only by two-way video connection.
