INSTRUCTIONS FOR USE: Company Medicare Medical Policies serve as guidance for the administration of plan benefits and do not constitute medical advice nor a guarantee of coverage. Company Medicare Medical Policies are reviewed annually to guide the coverage or non-coverage decision-making process for services or procedures in accordance with member benefit contracts (otherwise known as Evidence of Coverage or EOCs) and Centers of Medicare and Medicaid Services (CMS) policies, manuals, and other CMS rules and regulations. In the absence of a CMS coverage determination or specific regulation for a requested service, item or procedure, Company policy criteria or applicable utilization management vendor criteria may be applied. These are based upon published, peer-reviewed scientific evidence and evidence-based clinical practice guidelines that are available as of the last policy update. Coverage decisions are made on the basis of individualized determinations of medical necessity and the experimental or investigational character of the treatment in the individual case. In cases where medical necessity is not established by policy for specific treatment modalities, evidence not previously considered regarding the efficacy of the modality that is presented shall be given consideration to determine if the policy represents current standards of care.

The Company reserves the right to determine the application of Medicare Medical Policies and make revisions to these policies at any time. Any conflict or variance between the EOC and Company Medical Policy will be resolved in favor of the EOC.

SCOPE: Providence Health Plan, Providence Health Assurance, and Providence Plan Partners as applicable (referred to individually as "Company" and collectively as "Companies").

PRODUCT AND BENEFIT APPLICATION

MEDICARE COVERAGE CRITERIA

IMPORTANT NOTE: More than one Centers for Medicare and Medicaid Services (CMS) reference may apply to the same health care service, such as when more than one coverage policy is available (e.g., both an NCD and LCD exist). All references listed should be considered for coverage decision-making. The Company uses the most current version of a Medicare reference available at the time of publication; however, these websites are not maintained by the Company, so Medicare references and their corresponding hyperlinks may change at any time. If there is a conflict between the Company Medicare Medical Policy and CMS guidance, the CMS guidance will govern.

Service	Medicare Guidelines
Porcine Skin and Gradient	National Coverage Determination (NCD): Porcine Skin and Gradient

Wound) Indications	
	NOTE: For uses of these products not addressed by the LCD, see the Company medical policy below.
As of 2/12/2025 4/13/2025	LCD: Skin Substitute Grafts/Cellular and Tissue-Based Products for
1/1/2026**: Skin and Tissue	the Treatment of Diabetic Foot Ulcers and Venous Leg Ulcers
Substitutes for the Treatment	(<u>L39764</u>)
of Diabetic Foot Ulcers (DFU)	
and Venous Leg Ulcers (VLU)	NOTES:
**The effective date of this LCD has been delayed to 1/1/202 6 .	 This LCD includes information regarding general coverage requirements, definition of standard of care (SOC) wound treatment, utilization limits (e.g., quantity and frequency), and repeat treatments.
· · _	• The focus of this LCD is skin substitute grafts/cellular and tissue-based products (CTP) for the treatment of DFU and VLU. The use of these products for indications other than DFU or VLU are not addressed by this LCD. However, the LCD states that the use of the products must still meet the reasonable and necessary threshold for coverage. This includes, but is not limited to, the requirement that these products be used in accordance with their United States (U.S.) Food and Drug Administration (FDA) approved intended use. The Company medical policy below is used to determine medical necessity for these products for indications other than DFU or VLU.

Medicare Coverage Criteria: "MA organizations may create publicly accessible internal coverage criteria... when coverage criteria are not fully established in applicable Medicare statutes, regulations, NCDs or LCDs." (§ 422.101(b)(6) – see <u>Policy Guidelines</u> below)

- **Medicare Coverage Manuals:** Medicare does not have criteria for skin and tissue substitutes in a coverage manual.
- National Coverage Determination (NCD): With the exception of the products addressed by the above NCD, Medicare does not otherwise have an NCD for skin and tissue substitutes.
- Noridian J-F Local Coverage Determination (LCD)/Local Coverage Article (LCA): While there is a Noridian LCD which addresses the use of amniotic and placental-derived products, this LCD is for non-wound related indications. In addition, as of April 13, 2025 January 1, 2026, there is expected to be an available Noridian LCD to address the use of skin substitute products for DFU and VLU. However, it is not available for use as of the most recent review of this policy. In addition, as of the most recent policy review, no Medicare Administrative Contractors (MACs) have LCDs for skin substitutes in general, or for amniotic and placental-derived products for wound related indications other than DFU or VLU (i.e., no LCDs exist for the use of these products in the context of breast reconstructive procedures, nasal reconstructive procedures, burn wounds, surgical or traumatic wounds, etc.).
- Therefore, in the absence of established Medicare coverage criteria in a manual, NCD, LCD, or other regulatory guidance for the health plan's service area, Company criteria below are applied for medical necessity decision-making. In this case, Medicare coverage criteria are considered "not fully established" as defined under CFR § 422.101(6)(i)(B) as the available Medicare coverage policies require coverage decisions beyond the NCD and LCD due to many uses of these products being out of scope.
- **NOTE:** The summary of evidence, as well as the list of citations/references used in the development of the Company's internal coverage criteria, are publicly available and can be found using the Company medical policy link below [CFR § 422.101(6)(ii)(A) and (B)].

Company medical policy for Skin and Tissue Substitutes

- These services may be considered medically necessary for Medicare when the Company medical policy criteria are met.
- II. These services are considered **not medically necessary** for Medicare Plan members when the Company medical policy criteria are not met. See *Policy Guidelines below*.

IMPORTANT NOTICE: While some services or items may appear medically indicated for an individual, they may also be a direct exclusion of Medicare or the member's benefit plan. Such excluded services or items by Medicare and member EOCs include, but are not limited to, services or procedures considered to be cosmetic, not medical in nature, or those considered not medically reasonable or necessary under *Title XVIII of the Social Security Act, §1862(a)(1)(A)*. If there is uncertainty regarding coverage of a service or item, please review the member EOC or submit a pre-service organization determination request. Note that the Medicare Advance Beneficiary Notice of Noncoverage (ABN) form cannot be used for Medicare Advantage members. (Medicare Advance Written Notices of Non-coverage. MLN006266 May 2021)

The full Company portfolio of Medicare Medical Policies is available online and can be accessed here.

POLICY GUIDELINES

DOCUMENTATION REQUIREMENTS

Medical records documentation must clearly support the medical necessity of bioengineered skin and tissue substitutes. This would include the following:

- Characteristics of the wound/ulcer
- Wound/ulcer measurement
- Evidence of prior ineffective standard care, including the duration of this treatment
- The presence of qualifying or disqualifying conditions (i.e., HbA1C levels, ankle-brachial index [ABI])
- The name of the product, HCPCS code, size, and the amount of product used (or expected to be used).
- Any amount of wasted skin substitute grafts/CTP must be clearly documented in the procedure note with ALL the following information (at a minimum):
 - Date, time, and location of ulcer(s) treated.
 - Name of skin substitute grafts/CTP, package size and manufacturer's identification.
 - o Approximate amount of product unit used.
 - Approximate amount of product unit discarded.
 - Reason for the wastage (including the reason for using a package size larger than was necessary for the size of the ulcer, if applicable).
 - Manufacturer's serial/lot/batch or other unit identification number of grafts/CTP material. When the manufacturer does not supply unit identification, the record must document such. The amount billed as wastage cannot exceed the price of the package.
- The HCPCS code of the applicable skin substitute grafts/CTP and the units billed must be consistent with the medical record regarding wound description and size.

Additional applications

According to LCA A59628, documentation must support medical necessity for the use of **additional** applications or extended episode of treatment time and include:

- Explanation of why extended time or additional applications is medically necessary for the specific patient.
- The current treatment plan resulting in wound healing with the expectation the wound will
 continue to heal with this plan. Documentation should include estimated time of extended
 treatment, number of additional applications anticipated, and plan of care if healing is not
 achieved as planned.
- Modifiable risk factors (e.g., metabolic, vascular, external irritation) are being addressed to improve likelihood of healing.
- Appropriate consultation for the diagnosis and management of venous related ulceration of the lower extremity.

MEDICARE AND MEDICAL NECESSITY

Only medically reasonable and necessary services or items which treat illness or injury are eligible for Medicare coverage, as outlined in *Title XVIII of the Social Security Act, §1862(a)(1)(A)*.

The local Medicare Administrative Contractor (MAC) – Noridian – has a local coverage determination (LCD) for Amniotic and Placental-Derived Product Injections and/or Applications for Musculoskeletal Indications, Non-Wound; however, because this LCD is specific to non-wound related indications, it will not be applicable to many situations where these products are utilized. In addition, the Noridian LCD for *Wound and Ulcer Care* specifically states it does not apply to skin substitutes used in wound care. Therefore, for any service or indication which is **not** addressed by a Medicare policy or guideline, the Company policy criteria will be applied.

MA organizations (MAOs) make medical necessity determinations based on coverage and benefit criteria, current standards of care, the member's unique personal medical history (e.g., diagnoses, conditions, functional status, co-morbidities, etc.), physician recommendations, and clinical notes, as well as involvement of a plan medical director, where appropriate. (§ 422.101(c)(1))

In addition:

"MA organizations may create publicly accessible internal coverage criteria that are based on current evidence in widely used treatment guidelines or clinical literature when coverage criteria are not fully established in applicable Medicare statutes, regulations, NCDs or LCDs. Current, widely-used treatment guidelines are those developed by organizations representing clinical medical specialties, and refers to guidelines for the treatment of specific diseases or conditions. Acceptable clinical literature includes large, randomized controlled trials or prospective cohort studies with clear results, published in a peer-reviewed journal, and specifically designed to answer the relevant clinical question, or large systematic reviews or meta-analyses summarizing the literature of the specific clinical question." (§ 422.101(b)(6) and Medicare Managed Care Manual, Ch. 4, §90.5)

The Plan's Medicare policy for *PHA Medicare Medical Policy Development and Application* (MP50) provides details regarding Medicare's definition of medical necessity and the hierarchy of Medicare

references and resources during the development of medical policies, as well as the Plan's use of evidence-based processes for policy development.

The Noridian LCD for *Skin Substitute Grafts/Cellular and Tissue-Based Products for the Treatment of Diabetic Foot Ulcers and Venous Leg Ulcers* (L39764) was intended to be effective in February 2025, then it was postponed to April 2025, then postponed again to January 1, 2026. The Plan will continue to monitor the progress of this LCD for future application.

However, at this time, since there are not fully established coverage criteria for skin or tissue substitute products used for non-DFU or non-VLU purposes available in applicable Medicare statutes, regulations, NCDs or LCDs, then Company medical policy criteria will be applied. See the Medicare Coverage Criteria table above for more information regarding the use of internal coverage criteria when Medicare coverage criteria are not fully established.

REGULATORY STATUS

U.S. FOOD & DRUG ADMINISTRATION (FDA)

While clearance by the Food and Drug Administration (FDA) is a prerequisite for Medicare coverage, the 510(k) premarket clearance process does not in itself establish medical necessity. Medicare payment policy is determined by the interaction of numerous requirements, including but not limited to, the availability of a Medicare benefit category and other statutory requirements, coding and pricing guidelines, as well as national and local coverage determinations and clinical evidence.

BILLING GUIDELINES AND CODING

GENERAL

See associated local coverage article (LCA) for additional coding and billing guidance:

 Local coverage article (LCA): Billing and Coding: Skin Substitutes Grafts/Cellular and Tissue-Based Products for the Treatment of Diabetic Foot Ulcers and Venous Leg Ulcers (<u>A59628</u>)

According to the LCA, per the Current Procedural Terminology (CPT) codebook definition, skin substitute grafts include the following:

- non-autologous **human** skin (dermal or epidermal, cellular, and acellular) grafts (e.g., homograft, allograft).
- non-human skin substitute grafts (i.e., xenograft), and
- biological products that form a sheet scaffolding for skin growth.

Skin substitute graft application codes are **not** to be reported for application of *non-graft* wound dressings (e.g., gel, powder, ointment, foam, liquid) *or injected* skin substitutes. (LCA A59628)

The removal of a current graft and/or simple cleansing of the wound and other surgical preparation services are included in the skin substitute grafts/CTP and HCPCS application codes. Active wound care

management procedure codes (e.g., CPT code 97602) should **never** be reported with skin substitute grafts/CTP and HCPCS application codes.

According to the LCA, claims submitted with products using HCPCS code Q4100 or A4100 will be returned to the provider or rejected. The Medicare Advantage plan will not reject these claims, but rather, will review these using the above internal Company coverage criteria to assess medical necessity. Note that many products which may require the use of these "not otherwise specified" codes are not considered medically reasonable or necessary for any indication.

Multiple Wounds

According to the above LCA, skin substitute graft application codes are appropriately coded based upon total surface area of anatomical locations and not by number of ulcers. Therefore, the following is how to determine the surface area for application of skin substitute grafts for multiple wounds:

- <u>Same anatomical area:</u> The size of all wound areas within the same anatomic site described by the skin application code descriptors should be added together for a combined total surface area applied to that site.
- <u>Different anatomic areas:</u> The corresponding application code for each anatomical site should be billed with the composite wound surface area for each site, for each date of service.

Do not use modifier -59 on skin substitute graft application, or skin substitute product codes. (LCA A59628)

In addition, since coding for skin substitute graft application is based upon total surface area of the ulcers, the use of modifiers -50, -LT, and -RT would not be appropriate to append to skin substitute codes. (LCA A59628)

Associated or Related Services

Codes billed in association with the primary product code may also be denied if the product is not covered per the policy criteria above. Thus, when the skin substitute grafts/CTP HCPCS code is determined to be not medically necessary, the related application code will also be non-covered as not medically necessary. (LCA A59628)

Vocal Cord Paralysis Treatment

The following products are considered medically necessary and covered when billed for vocal cord paralysis treatment:

Products

- Q4112 (Cymetra)
- Q4114 (Integra flowable wound matrix)

Diagnosis codes

- J38.02 Paralysis of vocal cords and larynx, bilateral
- J38.00 Paralysis of vocal cords and larynx, unspecified
- J38.01 Paralysis of vocal cords and larynx, unilateral

CODES*

Note:

- Some codes which require prior authorization may have these requirements waived for select diagnosis codes (F64.0, F64.1, F64.8, or F64.9).
- Please refer to the Company non-covered and prior authorization lists for additional information.

*Coding Notes:

- The code list above is provided as a courtesy and may not be all-inclusive. Inclusion or omission of a code from this policy neither implies nor guarantees reimbursement or coverage. Some codes may not require routine review for medical necessity, but they are subject to provider contracts, as well as member benefits, eligibility and potential utilization audit. According to Medicare, "presence of a payment amount in the MPFS and the Medicare physician fee schedule database (MPFSDB) does not imply that CMS has determined that the service may be covered by Medicare." The issuance of a CPT or HCPCS code or the provision of a payment or fee amount by Medicare does not make a procedure medically reasonable or necessary or a covered benefit by Medicare. (Medicare Claims Processing Manual, Chapter 23 Fee Schedule Administration and Coding Requirements, §30 Services Paid Under the Medicare Physician's Fee Schedule, A. Physician's Services)
- All unlisted codes are reviewed for medical necessity, correct coding, and pricing at the claim level. If an unlisted code is submitted for non-covered services addressed in this policy then it will be denied as not covered. If an unlisted code is submitted for potentially covered services addressed in this policy, to avoid post-service denial, prior authorization is recommended.
- See the non-covered and prior authorization lists on the Company <u>Medical Policy, Reimbursement Policy, Pharmacy Policy and Provider Information website</u> for additional information.
- HCPCS/CPT code(s) may be subject to National Correct Coding Initiative (NCCI) procedure-to-procedure (PTP) bundling
 edits and daily maximum edits known as "medically unlikely edits" (MUEs) published by the Centers for Medicare and
 Medicaid Services (CMS). This policy does not take precedence over NCCI edits or MUEs. Please refer to the CMS website
 for coding guidelines and applicable code combinations.

POLICY REVISION HISTORY

DATE	REVISION SUMMARY
3/2023	New Medicare Advantage medical policy
4/2023	Q2 2023 code update
7/2023	Q3 2023 code update
10/2023	Q4 2023 code update
1/2024	Q1 2024 code update

2/2024	Annual review, no change to criteria
4/2024	Updated codes to match prior authorization list and Q2 2024 code update
7/2024	Interim update and Q3 2024 code update; add LCD L39118
10/2024	Interim update and Q4 2024 code update; update CMS regulatory language
1/2025	Q1 2025 code update
3/2025	Annual review; add LCD L39764 (Noridian changed the effective date from 2/12/2025 to
	4/13/2025)
4/2025	Interim update and Q2 2025 code updates (Noridian changed the effective date from
	4/13/2025 to 1/1/2026)
5/2025	Interim update to align with postponed MAC LCD
7/2025	Q3 2025 code update
10/2025	Q4 2025 code update (10/24/2025: Replaced L39118 with L39116 due to Noridian JF
	consolidation with JE LCD policies)
