

MEDICAL POLICY	Circulating Tumor Cell and DNA Assays For Cancer Management (Medicare Only)
Effective Date: 1/1/2022	Medical Policy Number: 306
 1/1/2022	Medical Policy Committee Approved Date: 5/2021; 11/2021
Medical Officer	Date

See Policy CPT/HCPCS CODE section below for any prior authorization requirements

SCOPE:

Providence Health Plan, Providence Health Assurance, Providence Plan Partners, and Ayin Health Solutions as applicable (referred to individually as “Company” and collectively as “Companies”).

APPLIES TO:

Medicare Only

DOCUMENTATION REQUIREMENTS:

In order to review for medical necessity under *Social Security Act, §1862(a)(1)(A)*, the following documentation **must** be provided. If any of these items are not submitted, the review may be delayed, and the decision outcome could be affected:

- Laboratory name and location.
- Test name (if appropriate, the proprietary test name, especially for panel tests) and relevant CPT code(s)
 - Non-specific (e.g., 81401, 81402, etc.) or unlisted (e.g., 81479) CPT codes are not sufficient to satisfy this requirement alone. Test/gene description or name is required.
- Documented diagnosis of a recurrent, relapsed, refractory, metastatic, or advanced solid tumor.
- Documentation of any prior genetic or molecular testing performed for the individual.
- Documentation of cancer treatments being considered for the individual, meeting both of the following:
 - The patient must be a candidate for further treatment; and
 - The drug must be:
 - FDA-approved for that patient’s cancer **OR** have a National Comprehensive Cancer Network (NCCN) 1 or NCCN 2A recommendation for that patient’s cancer, and
 - The FDA-approved indication or NCCN recommendation must be based on information about the presence or absence of a genetic biomarker tested for in the test (i.e., the medication being considered must be indicated for tumors that rely on relevant gene mutation or variant test results. Medications or cancer treatment that are not dependent on genetic test results would not require the

MEDICAL POLICY	Circulating Tumor Cell and DNA Assays For Cancer Management (Medicare Only)
-----------------------	--

use of genetic testing to proceed with such treatment decisions, thus resulting in genetic testing not being medically necessary to proceed with such treatments).

- Documentation of either no prior cancer treatments for the cancer being tested ***OR*** documentation of prior cancer treatments that have been used with the noted response to those treatments.
- Tissue based testing:
 - Documentation must support tissue-based, comprehensive genomic profiling (CGP) is infeasible (e.g., quantity not sufficient for tissue-based CGP or invasive biopsy is medically contraindicated); or
 - For NSLC, documentation that tissue-based CGP did not show actionable mutations.

MEDICARE POLICY CRITERIA

The following Centers for Medicare & Medicaid Service (CMS) guidelines should be utilized for medical necessity coverage determinations. Click the link provided in the table below to access applicable medical necessity criteria. All listed guidelines apply.

Notes:

- This policy does not address cell-free DNA tests (also known as circulating tumor DNA tests or liquid biopsies) for non-small cell lung cancer. (See [Cross References](#) section below)

Service	Medicare Guidelines
<p><i>Next-generation sequencing assays performed on solid tumor cell-free DNA in plasma (i.e. liquid biopsies)</i></p> <p>See “Policy Guidelines” for notes regarding Guardant360 test options.</p>	<ul style="list-style-type: none"> • For all FDA-approved or FDA-cleared tests: National Coverage Determination (NCD) for Next Generation Sequencing (NGS) (90.2) <p>*Note: This NCD is limited to NGS <i>DNA</i> sequencing tests which are FDA-approved or cleared as a companion diagnostic (CDx) test and only when used for cancer-related purposes. For all other tests, including tests which are not FDA-approved or cleared as a CDx test, tests which have a specific LCD or LCA available, NGS <i>RNA</i> sequencing tests, tests performed for indications outside of their FDA-approved or -cleared intended use, or for tests related to <i>non-cancer</i> indications, see separate Medicare references below or separate Medicare policies.</p> <ul style="list-style-type: none"> • Testing performed in NC, SC, AL, GA, VA, KY, OH, WV, AK, ID, OR, WA, UT, AZ, MT, ND, SD, WY, CA and NV: Local Coverage Determination (LCD): MoIDX: Plasma-Based Genomic Profiling in Solid Tumors (L38043)* <p><small>*Since several Medicare contractors use MoIDX guidance policies, the Palmetto LCD L38043 will be used until a corresponding LCD for each</small></p>

MEDICAL POLICY	Circulating Tumor Cell and DNA Assays For Cancer Management (Medicare Only)
-----------------------	--

	<p>respective service area is effective and final. Once each service area’s LCD is final, it will replace L38043 for that service area.</p> <p>The above LCD requires successful completion of a technical assessment (TA) by the MoIDX Program contractor. According to this LCD, “Other liquid biopsies will be covered for the same indications if they display similar performance in their intended used applications to Guardant360®.” Tests that do not have FDA-approval or clearance must be listed on the DEX™ Change Healthcare Registry website as a potentially covered test by MoIDX for Medicare. If a test is not listed in this policy, further research may be required.</p> <ul style="list-style-type: none"> Local Coverage Article (LCA): Billing and Coding: Guardant360® (A58214) (Note, this is the laboratory developed test available as of May 2014, not the CDx test, which is FDA-approved) LCD for MoIDX: Phenotypic Biomarker Detection from Circulating Tumor Cells (L38645)
<i>PIK3CA Gene Tests</i>	Local Coverage Article: Billing and Coding: MoIDX: PIK3CA Gene Tests (A55200)

*In the absence of a Medicare coverage policy or guidance (e.g., manual, national coverage determination [NCD], local coverage determination [LCD] article [LCA], etc.), Medicare guidelines allow a Medicare Advantage Organization (MAO) to make coverage determinations, applying an objective, evidence-based process, based on authoritative evidence. (Medicare IOM Pub. No. 100-16, Ch. 4, §90.5) Therefore, the commercial medical policy, **Circulating Tumor Cell and DNA Assays For Cancer Management (All Lines of Business Except Medicare)** applies to the following services:*

- RadTox™ cfDNA test (DiaCarta Clinical Lab)

POLICY GUIDELINES

Guardant offers multiple “Guardant360®” test options. Only the Guardant360® CDx test has been FDA approved (as of August 2020). All other Guardant tests are lab-developed tests without FDA approval. In addition, the Guardant360 TissueNext™ test is **not** a liquid biopsy, and therefore, this medical policy would **not** apply to this test.

BILLING GUIDELINES

See associated local coverage articles (LCAs) for additional coding and billing guidance.

- LCA: Billing and Coding: MoIDX: Phenotypic Biomarker Detection from Circulating Tumor Cells ([A58185](#))

CPT/HCPCS CODES

Medicare Only	
Prior Authorization Required	
0155U	PIK3CA (phosphatidylinositol-hyphen4,5-hyphenbisphosphate 3-hyphenkinase, catalytic subunit alpha) (eg, breast cancer) gene analysis (ie, p.C420R, p.E542K, p.E545A, p.E545D [g.1635G>T only], p.E545G, p.E545K, p.Q546E, p.Q546R, p.H1047L, p.H1047R, p.H1047Y)
0177U	Oncology (breast cancer), DNA, PIK3CA (phosphatidylinositol-hyphen4,5-hyphenbisphosphate 3-hyphenkinase catalytic subunit alpha) gene analysis of 11 gene variants utilizing plasma, reported as PIK3CA gene mutation status
0229U	BCAT1(Branched chain amino acid transaminase 1) or IKZF1 (IKAROS family zinc finger 1) (eg, colorectal cancer) promoter methylation analysis
81309	PIK3CA (phosphatidylinositol-hyphen4, 5-hyphenbiphosphate 3-hyphenkinase, catalytic subunit alpha) (eg, colorectal and breast cancer) gene analysis, targeted sequence analysis (eg, exons 7, 9, 20)
86152	Cell enumeration using immunologic selection and identification in fluid specimen (eg, circulating tumor cells in blood)
86153	Cell enumeration using immunologic selection and identification in fluid specimen (eg, circulating tumor cells in blood); physician interpretation and report, when required
Not Covered	
0285U	Oncology, response to radiation, cell-free DNA, quantitative branched chain DNA amplification, plasma, reported as a radiation toxicity score
Unlisted Codes	
All unlisted codes will be reviewed for medical necessity, correct coding, and pricing at the claim level. If an unlisted code is billed related to services addressed in this policy then prior-authorization is required.	
81479	Unlisted Molecular Pathology

INSTRUCTIONS FOR USE

Company Medical Policies serve as guidance for the administration of plan benefits. Medical policies do not constitute medical advice nor a guarantee of coverage. Company Medical Policies are reviewed annually and are based upon published, peer-reviewed scientific evidence and evidence-based clinical practice guidelines that are available as of the last policy update. The Companies reserve the right to determine the application of Medical Policies and make revisions to Medical Policies at any time. Providers will be given at least 60-days notice of policy changes that are restrictive in nature.

The scope and availability of all plan benefits are determined in accordance with the applicable coverage agreement. Any conflict or variance between the terms of the coverage agreement and Company Medical Policy will be resolved in favor of the coverage agreement.

MEDICAL POLICY	Circulating Tumor Cell and DNA Assays For Cancer Management (Medicare Only)
-----------------------	--

REGULATORY STATUS

Mental Health Parity Statement

Coverage decisions are made on the basis of individualized determinations of medical necessity and the experimental or investigational character of the treatment in the individual case. In cases where medical necessity is not established by policy for specific treatment modalities, evidence not previously considered regarding the efficacy of the modality that is presented shall be given consideration to determine if the policy represents current standards of care.
