See Policy CPT CODE section below for any prior authorization requirements

SCOPE:

Providence Health Plan, Providence Health Assurance, Providence Plan Partners, and Ayin Health Solutions as applicable (referred to individually as “Company” and collectively as “Companies”).

APPLIES TO:

All lines of business

BENEFIT APPLICATION

Medicaid Members

Oregon: Services requested for Oregon Health Plan (OHP) members follow the OHP Prioritized List and Oregon Administrative Rules (OARs) as the primary resource for coverage determinations. Medical policy criteria below may be applied when there are no criteria available in the OARs and the OHP Prioritized List.

POLICY CRITERIA

Note: This policy does not address orthognathic surgery for the treatment of obstructive sleep apnea (OSA). Please see the medical policy titled “Sleep Apnea: Surgical Treatments”.

- I. Orthognathic surgery may be considered **medically necessary and covered** to improve function (e.g., speech, swallowing, and /or chewing) through correction of an underlying skeletal deformity which is due to **at least one** of the following (1.-4):
 1. Craniofacial anomaly which is defined as a physical disorder identifiable at birth that effects the bony structures of the face and head (e.g., cleft lip/palate, craniosynostosis, craniofacial microsomia, and Treacher Collins syndrome); **or**
 2. Cysts and/or tumors of the jaw; **or**
 3. Degenerative disease (e.g., osteoradionecrosis); **or**
 4. Traumatic injury.

MEDICAL POLICY	Orthognathic Surgery
-----------------------	-----------------------------

- II. Orthognathic surgery is considered **not medically necessary and is not covered** when criterion I. above is not met, including but not limited to:
 - A. Developmental maxillofacial conditions that result in overbite, crossbite, malocclusion, or similar developmental irregularities of the teeth; **or**
 - B. Temporomandibular joint disorder.

 - III. In accordance with Oregon House Bill 4128, orthodontics (even in association with orthognathic surgery) may be considered **medically necessary and covered** for the treatment of craniofacial anomalies when the services are needed to restore function (e.g., speech, swallowing, chewing).

 - IV. In accordance with Oregon House Bill 4128, maxillofacial prosthetic services may be considered **medically necessary and covered** as an adjunctive treatment. This means restoration and management of head and facial structures that cannot be replaced with living tissue and that are defective because of disease, trauma, or birth and developmental deformities when such restoration and management are performed for the purpose of:
 - A. Controlling or eliminating infection; **or**
 - B. Controlling or eliminating pain; **or**
 - C. Restoring facial configuration or functions such as speech swallowing or chewing but not including cosmetic procedures rendered to improve on the normal range of conditions.
- Note: See [Policy Guidelines](#) for full description of Oregon House Bill 4128.

CPT CODES

All Lines of Business	
Prior Authorization Required	
21070	Coronoidectomy (separate procedure)
21081	Impression and custom preparation; mandibular resection prosthesis
21082	Impression and custom preparation; palatal augmentation prosthesis
21083	Impression and custom preparation; palatal lift prosthesis
21085	Impression and custom preparation; oral surgical splint
21141	Reconstruction midface, LeFort I; single piece, segment movement in any direction (eg, for Long Face Syndrome), without bone graft
21142	Reconstruction midface, LeFort I; 2 pieces, segment movement in any direction, without bone graft
21143	Reconstruction midface, LeFort I; 3 or more pieces, segment movement in any direction, without bone graft
21145	Reconstruction midface, LeFort I; single piece, segment movement in any direction, requiring bone grafts (includes obtaining autografts)

MEDICAL POLICY	Orthognathic Surgery
-----------------------	-----------------------------

21146	Reconstruction midface, LeFort I; 2 pieces, segment movement in any direction, requiring bone grafts (includes obtaining autografts) (eg, ungrafted unilateral alveolar cleft)
21147	Reconstruction midface, LeFort I; 3 or more pieces, segment movement in any direction, requiring bone grafts (includes obtaining autografts) (eg, ungrafted bilateral alveolar cleft or multiple osteotomies)
21150	Reconstruction midface, LeFort II; anterior intrusion (eg, Treacher-Collins Syndrome)
21151	Reconstruction midface, LeFort II; any direction, requiring bone grafts (includes obtaining autografts)
21154	Reconstruction midface, LeFort III (extracranial), any type, requiring bone grafts (includes obtaining autografts); without LeFort I
21155	Reconstruction midface, LeFort III (extracranial), any type, requiring bone grafts (includes obtaining autografts); with LeFort I
21159	Reconstruction midface, LeFort III (extra and intracranial) with forehead advancement (eg, mono bloc), requiring bone grafts (includes obtaining autografts); without LeFort I
21160	Reconstruction midface, LeFort III (extra and intracranial) with forehead advancement (eg, mono bloc), requiring bone grafts (includes obtaining autografts); with LeFort I
21196	Reconstruction of mandibular rami and/or body, sagittal split; with internal rigid fixation
21198	Osteotomy, mandible, segmental
21199	Osteotomy, mandible, segmental; with genioglossus advancement
21206	Osteotomy, maxilla, segmental (eg, Wassmund or Schuchard)
21208	Osteoplasty, facial bones; augmentation (autograft, allograft, or prosthetic implant)
21209	Osteoplasty, facial bones; reduction
21210	Graft, bone; nasal, maxillary or malar areas (includes obtaining graft)
21215	Graft, bone; mandible (includes obtaining graft)
21230	Graft; rib cartilage, autogenous, to face, chin, nose or ear (includes obtaining graft)
21244	Reconstruction of mandible, extraoral, with transosteal bone plate (eg, mandibular staple bone plate)
21245	Reconstruction of mandible or maxilla, subperiosteal implant; partial
21246	Reconstruction of mandible or maxilla, subperiosteal implant; complete
21247	Reconstruction of mandibular condyle with bone and cartilage autografts (includes obtaining grafts) (eg, for hemifacial microsomia)
21248	Reconstruction of mandible or maxilla, endosteal implant (eg, blade, cylinder); partial
21249	Reconstruction of mandible or maxilla, endosteal implant (eg, blade, cylinder); complete
No Prior Authorization Required	
21125	Augmentation, mandibular body or angle; prosthetic material
21127	Augmentation, mandibular body or angle; with bone graft, onlay or interpositional (includes obtaining autograft)
21188	Reconstruction midface, osteotomies (other than LeFort type) and bone grafts (includes obtaining autografts)
21193	Reconstruction of mandibular rami, horizontal, vertical, C, or L osteotomy; without bone graft
21194	Reconstruction of mandibular rami, horizontal, vertical, C, or L osteotomy; with bone graft (includes obtaining graft)

MEDICAL POLICY	Orthognathic Surgery
-----------------------	-----------------------------

21195	Reconstruction of mandibular rami and/or body, sagittal split; without internal rigid fixation
Unlisted Codes All unlisted codes will be reviewed for medical necessity, correct coding, and pricing at the claim level. If an unlisted code is billed related to services addressed in this policy then prior-authorization is required.	
21089	Unlisted maxillofacial prosthetic procedure

POLICY GUIDELINES

Oregon House Bill 4128¹

743A.150 Treatment of Craniofacial Anomaly

- (1) As used in this section, 'craniofacial anomaly' means a physical disorder identifiable at birth that affects the bony structures of the face or head, including but not limited to cleft palate, cleft lip, craniosynostosis, craniofacial microsomia and Treacher Collins syndrome.
- (2) All health benefit plans, as defined in ORS 743.730, providing coverage of hospital, surgical or dental services, shall provide coverage for dental and orthodontic services for the treatment of craniofacial anomalies if the services are medically necessary to restore function.
- (3) This section does not require coverage for the treatment of:
 - (a) Developmental maxillofacial conditions that result in overbite, crossbite, malocclusion or similar developmental irregularities of the teeth; or
 - (b) Temporomandibular joint disorder.
- (4) Coverage required by this section may be subject to copayments, deductibles and coinsurance imposed on similar services by the terms of the plan.

743A.148 Maxillofacial Prosthetic Services

- (1) The Legislative Assembly declares that all group health insurance policies providing hospital, medical or surgical expense benefits, other than limited benefit coverage, include coverage for maxillofacial prosthetic services considered necessary for adjunctive treatment.
- (2) As used in this section, "maxillofacial prosthetic services considered necessary for adjunctive treatment" means restoration and management of head and facial structures that cannot be replaced with living tissue and that are defective because of disease, trauma or birth and developmental deformities when such restoration and management are performed for the purpose of:
 - (a) Controlling or eliminating infection;
 - (b) Controlling or eliminating pain; or
 - (c) Restoring facial configuration or functions such as speech, swallowing or chewing but not including cosmetic procedures rendered to improve on the normal range of conditions.
- (3) The coverage required by subsection (1) of this section may be made subject to provisions of the policy that apply to other benefits under the policy including, but not limited to, provisions relating to deductibles and coinsurance.

DESCRIPTION

According to the American Association of Oral and Maxillofacial Surgeons, “orthognathic surgery is the surgical correction of abnormalities of the mandible, maxilla, or both.”² The abnormality may be present at birth (i.e., congenital), may become apparent as the patient develops, or may be the result of a traumatic injury. The primary goal of treatment is to improve craniofacial function (e.g., speech, swallowing, and/or chewing) by correcting the underlying skeletal deformity.

CENTERS FOR MEDICARE & MEDICAID

As of 04/25/2021, no Centers for Medicare & Medicaid (CMS) coverage guidance was identified which addresses orthognathic surgery for the treatment of conditions other than obstructive sleep apnea.

INSTRUCTIONS FOR USE

Company Medical Policies serve as guidance for the administration of plan benefits. Medical policies do not constitute medical advice nor a guarantee of coverage. Company Medical Policies are reviewed annually and are based upon published, peer-reviewed scientific evidence and evidence-based clinical practice guidelines that are available as of the last policy update. The Companies reserve the right to determine the application of Medical Policies and make revisions to Medical Policies at any time. Providers will be given at least 60-days notice of policy changes that are restrictive in nature.

The scope and availability of all plan benefits are determined in accordance with the applicable coverage agreement. Any conflict or variance between the terms of the coverage agreement and Company Medical Policy will be resolved in favor of the coverage agreement.

REGULATORY STATUS

Mental Health Parity Statement

Coverage decisions are made on the basis of individualized determinations of medical necessity and the experimental or investigational character of the treatment in the individual case. In cases where medical necessity is not established by policy for specific treatment modalities, evidence not previously considered regarding the efficacy of the modality that is presented shall be given consideration to determine if the policy represents current standards of care.
